C A U T I O N S

- P.C.Board should not be exposed direct to the sun. Direct sunshine is very harmful to LSI(memory element).
- 2. P.C.Board to be stored or transported should be wrapped by a conductive pouch or aluminum foil, because LSI and IC used in the machine are semiconductor integrated circuits of which basic element is MOS-FET.
- When images on the Video Monitor screen are disturbed by powerful noise or other electrical causes, turn the main power off once and then on again.

Specifications are subject to change for improvement without notice. NOTE:

3-1 Cautions on installation

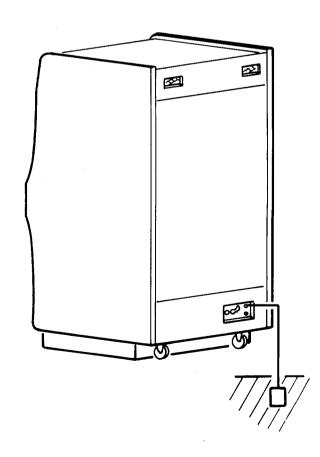

- (1) The power cord of the machine should not be connected to a wall outlet together with large load unit(s) such as motor, cooler, etc.
- (2) Turn the power off before setting and removing the P.C. Board and connectors. Carefully handle them.
- (3) Do not touch IC, LSI and other electronic parts on P.C. Board.
 Do not use a tester or the like on them. (They may be damaged by the inner voltage of the instruments.)
- (4) When exchanging a fuse, use a new one of the prescribed capacity.
- (5) The machine should be installed where it is not hot, keeping away from a heating appliance and direct sunshine.
- (6) The machine should be installed where it is not wet and dusty.
- (7) Do not touch the inside of the video monitor which has high tension units. Inform service station, if necessary.

3-2 Earthing of machine

- (1) When the machine is installed in a wet place, it should be grounded to avoid accident by an electric shock.
 - a) Connect an earthing wire to the earthing terminal of the machine
 - b) The opposite end of the earthing wire should be connected to an earthing bar which is firmly inserted into the ground.

(2) Cautions

- a) Do not connect the earthing wire to a water pipe, because polyvinyl-choloride pipes are sometimes used in the water lines and, if so, the electronic continuity is cut at the points.
- b) Do not connect the earthing wire to the gas pipe absolutely. That is very dangerous.

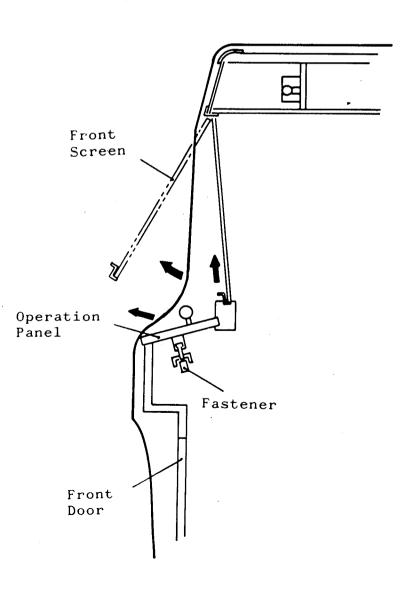

4. MAINTENANCE AND INSPECTION

Opening the back door, pull the front screen clamp which is mounted under the top plate. Pull the front screen upward while pushing and then pull toward you.

Front Screen Clamp

.4-1 Dismounting of front screen

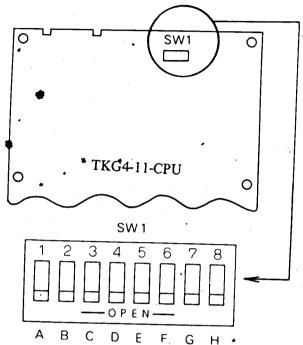

4-2 Dismounting of operation panel

To dismount the operation panel for maintenance or inspection of the Control Unit or Micro Switch, open the front door and unfasten the fastener.

5. POINTS AND METHODS OF ADJUSTMENT

5-1 CPU P*C.Board

The number of Jumpman, score level, the number of coin and type of machine can be set with the switches on CPU P.C.Board according to the diagram below.

NOTE: Keep the switch H always at the ON position.

5-2 Adjustment of Semi-Fixed Resistors

VIDEO P.C. Board

Semi-fixed resistors, VR1 and VR2 on VIDEO P.C. Board are used to adjust video monitor screen.

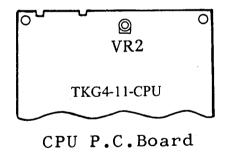

VIDEO P.C.Board

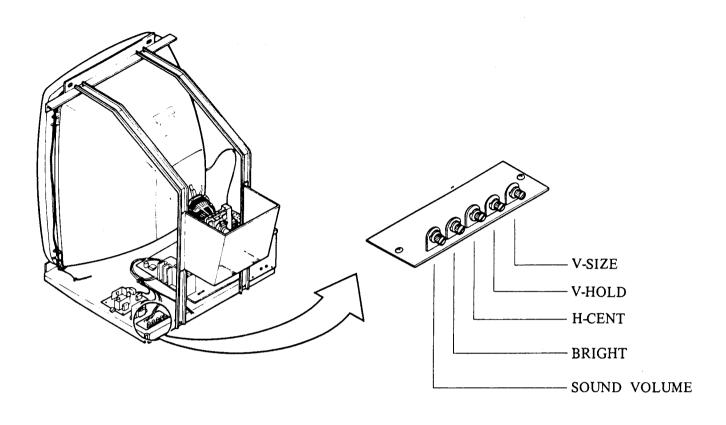

VRI	$50K\Omega$ 1/3W top type white knob	Turn right to move image downward.
VR2	$50K\Omega$ 1/3W top type white knob	Turn right to move image leftward

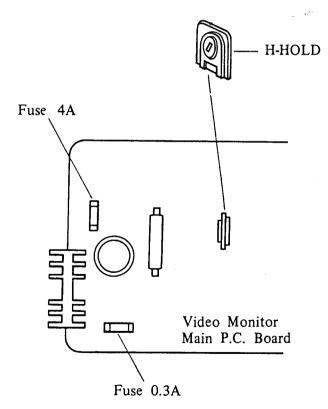

CPU P. C. Board

Semi-fixed resistor, VR2 on CPU P.C. Board is used to adjust sound balance.

		
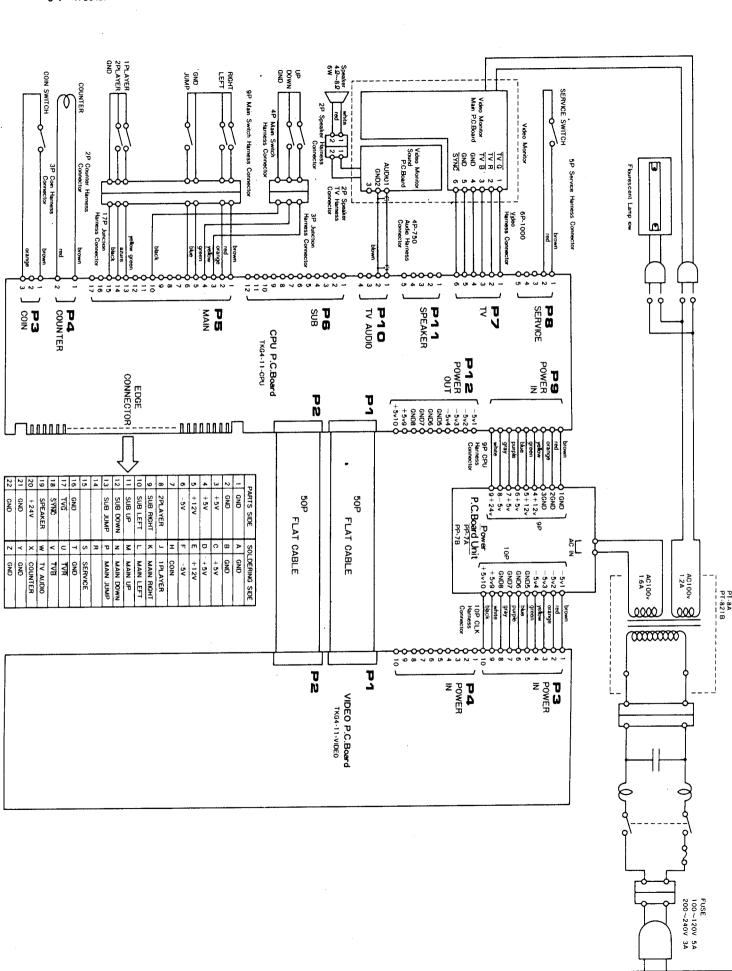

VR2	$10K\Omega$ 1/5W plain type white knob	Balance of effective sound

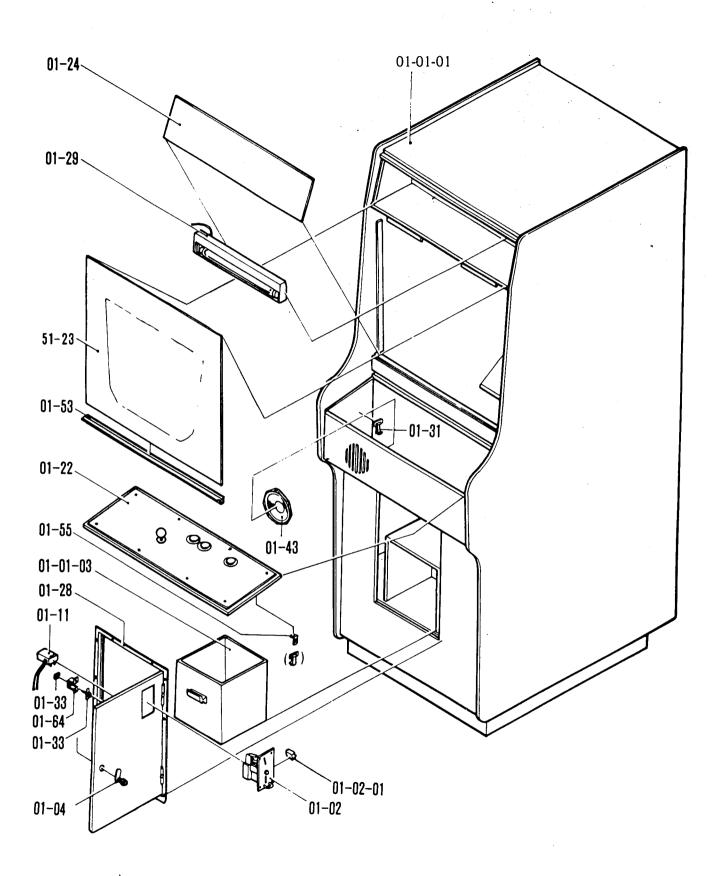

NOTE: Do not touch the inside of the Video Monitor in which many parts are supplied with high tension.
